Leading European and international academics, practitioners, and policy-makers provide in-depth scholarly **articles** covering a wide range of timely and challenging issues in the law and governance of the European and international environment. The **Current Survey** section provides an authoritative and comprehensive review of the yearly legislative, policy, and judicial developments in the main environmental policy fields at EC, national, and international levels. Each volume features a **Documents** section with summaries and full texts of policy briefs and preparatory EU documents including Commission communications and reports, all critically assessed by leading EC environmental law expert Ludwig Krämer. Finally, each volume is completed by a collection of valuable critical **reviews of books** and a unique review of highlights of recent publications in European and international environmental law and policy.
