

Table of Contents

<i>Editorial</i>	v
 <i>Part 1: Context and rationale of research focus for military deployment</i>	
1. Key Technologies for the Military in the Next Decade - Challenges and Limitations <i>A.J. van der Wal</i>	1
 <i>Part 2: Technologies: Current state-of-the-art hardware technologies and outlook on future and emerging technologies</i>	
2. Calculating Possible Launcher Locations for Anti-Satellite Missiles <i>R. Savelsberg and L. Koene</i>	25
3. Producing Near-Real-Time Intelligence: Predicting the World of Tomorrow <i>A.I. Barros, A.C. van den Broek, J.A. van Dalen, B. van der Vecht, and J. Wevers</i>	49
4. Vulnerabilities of Global Navigation Satellite Systems <i>P.J. Oonincx and C.A. Scheele</i>	73
5. Military Sensor Technology; Modern Developments and Challenges <i>J. Derksen, F. Bolderheij, M. Hartemink, R.R. Hordijk, and O.J.G. Somsen,</i>	93
 <i>Part 3: Theory on system integration, planning and logistics</i>	
6. Conflict Detection and Resolution for Semi-Autonomous Vessels <i>E. Theunissen and C.A. de Groot</i>	137
7. Online UAV Mission Planning <i>L. Evers, A.I. Barros, M. Monsuur, and A.P.M. Wagelmans</i>	159
8. A Game-Theoretic Attacker-Defender Model for a Sea-Base: Optimal Deployment at the Maritime Battleground <i>H. Monsuur, R.H.P. Janssen, and H.G. Jutte</i>	179

9. Use of Chat for C2 Communications in Anti-Piracy Operations <i>O. Boot and T.J. Grant</i>	207
10. Towards TOP Patterns for Command and Control <i>J.M. Jansen and B. Lijnse</i>	235
<i>Part 4: Future life-cycle management</i>	
11. The Strategic Value of Life-Cycle Costing <i>R.J.M. Beeres, P.C. van Fenema, M.T.I.B. Bollen, and E. Dado</i>	259
12. Advanced Predictive Maintenance Concepts Based on the Physics of Failure <i>T. Tinga, A.M. Homburg, M. Woldman, N.A. Heerink, and M. Smeding</i>	291
13. An Aeroelastic Model of a Helicopter Rotor <i>R.P. Notenboom and H.L.H. Lootens</i> <i>Short communications: Abstracts of recent B.Sc. theses</i>	315
14. Towards the More-electric Submarine: A Feasibility Study to the Applicability of Electric Actuators on Board of Submarines <i>A.J. van Fulpen</i>	343
15. The Feasibility of Liquified Natural Gas as a Fuel for Naval Ships <i>R.M. Essing</i>	347
<i>Contributors</i>	353
