## Acknowledgements

This book comes as a result of a magnificent collective effort that mostly took place during the COVID-19 pandemic, perhaps one of the most turbulent times of contemporary history. These few lines try to summarize our dearest *thank you* to those behind this effort.

First, we thank all the authors that participated in this volume, which could not have come into existence without their fantastic contributions. All authors have shared their time and thoughts, and delivered outstanding scholarship, providing insights into their research on how law shapes AI and vice versa.

Second, we thank all the reviewers who ensured the academic quality of the contributions of this book. The pool of reviewers was formed by several of the authors that contributed to the book. Other scholars did a phenomenal job helping us with the review process, and we would like to thank them personally. Thank you Linda Louis, Lexo Zardiashvili, Henrik Skaug Sætra, Desara Dushi and Nertil Berdufi, Alejandro Zornoza Somolinos, Anne Kjersti Befring and Vibeke Vallevik, Tomás Gabriel García-Micó, and Yorick van Benten for your time and help in reviewing the contributions.

Third, a special thank you to Hadassah Drukarch for her immense work in helping us with all the not-that-fun and behind-the-scenes logistics that come with a large volume like this one. Hadassah was working at the time as a research assistant at the eLaw Center for Law and Digital Technologies at Leiden University when, apart from contributing to the book as an author, she also contributed to ensuring we kept to the deadlines, and assisted us in the communication with the authors, the reviewers, and the publishing house. Last but not least, we would like to thank the people in the SAILS project, Leiden University's interdisciplinary AI research program, and eLaw, the Leiden Law School's Centre for Law and Digital Technologies, for facilitating, encouraging, and supporting this book and our work in the field of Law and Digital Technologies.

Leiden, The Netherlands May 2022 Bart Custers Eduard Fosch-Villaronga

# Contents

### Part I Introduction

1	Humanizing Machines: Introduction and OverviewBart Custers and Eduard Fosch-Villaronga	3
2	Artificial Intelligence Versus Biological Intelligence: A Historical Overview Roy de Kleijn	29
3	<b>Disciplines of AI: An Overview of Approaches and Techniques</b> Andreas Häuselmann	43
Par	t II Public Law	
4	Discrimination by Machine-Based Decisions: Inputs and Limits of Anti-discrimination Law Dolores Morondo Taramundi	73
5	Women's Rights Under AI Regulation: Fighting AI Gender Bias Through a Feminist and Intersectional Approach María López Belloso	87
6	<b>Diversity and Inclusion in Artificial Intelligence</b> Eduard Fosch-Villaronga and Adam Poulsen	109
7	Artificial Intelligence in Disability Employment:Incorporating a Human Rights ApproachElisavet Athanasia Alexiadou	135
8	Prosecuting Killer Robots: Allocating CriminalResponsibilities for Grave Breaches of InternationalHumanitarian Law Committed by Lethal AutonomousWeapon SystemsValeria Chiappini Koscina	149

# **About the Editors**

Prof. Bart Custers Ph.D. M.Sc. LLM is a (full) professor of Law and Data Science and the director of eLaw, Center for Law and Digital Technologies at Leiden University, the Netherlands. He has a background in both law and physics and is an expert in the area of law and digital technologies, including topics like profiling, big data, privacy, discrimination, cybercrime, technology in policing, and artificial intelligence. As a researcher and project manager, he acquired and executed research for the European Commission, NWO (the National Research Council in the Netherlands), the Dutch national government, local government agencies, large corporations, and SMEs. Until 2016, he was the head of the research department on Crime, Law enforcement and Sanctions of the scientific research center (WODC) of the ministry of security and justice in the Netherlands. Before that, he worked for the national government as a senior policy advisor for consecutive ministers of justice (2009–2013) and for a large consultancy firm as a senior management consultant on information strategies (2005-2009). On behalf of the Faculty of Law, he is the coordinator of the SAILS project. This project, funded by the Executive Board of Leiden University, deals with the societal and legal implications of artificial intelligence.

He published three books on profiling, privacy, discrimination, and big data, two books on the use of drones, and one book on the use of bitcoins for money laundering cybercrime profits. On a regular basis, he gives lectures on profiling, privacy and big data and related topics. He has presented his work at international conferences in the United States, Canada, China, Japan, Korea, Malaysia, Thailand, the Middle East, and throughout Europe. He has published his work, over a hundred publications, in scientific and professional journals and in newspapers.

**Dr. Eduard Fosch-Villaronga** is an Assistant Professor at the eLaw Center for Law and Digital Technologies at Leiden University (NL) where he investigates legal and regulatory aspects of robot and AI technologies, with a special focus on healthcare. He is currently the Principal Investigator of PROPELLING (2021–2022), an FSTP from the H2020 Eurobench project, a project using robot testing zones to support

evidence-based robot policies. He is also the co-leader of the project Gendering Algorithms, an interdisciplinary pilot project aiming to explore the functioning, effects, and governance policies of AI-based gender classification systems.

Eduard published the book "Robots, Healthcare, and the Law. Regulating Automation in Personal Care" with Routledge and is interested in human–robot interaction, responsible innovation, and the future of law. He was the PI of LIAISON (2020– 2021), an FSTP from the H2020 COVR project that aims to link robot development and policymaking to reduce the complexity in robot legal compliance. He was also the co-leader of the Ethical, Legal, and Societal Aspects Working Group at the H2020 Cost Action 16116 on Wearable Robots and participates actively at the Social Responsibility Working Group at the H2020 Cost Action 19121 GoodBrother. In 2020, he served the European Commission in the Sub-Group on Artificial Intelligence (AI), connected products and other new challenges in product safety to the Consumer Safety Network (CSN) to revise the General Product Safety directive.

Previously, he was the recipient of a personal Marie Skłodowska-Curie Postdoctoral Researcher under the COFUND LEaDing Fellows at the eLaw Center for Law and Digital Technologies at Leiden University (NL) (Jan 2019–Dec 2020). He also was a postdoc at the Microsoft Cloud Computing Research Center at Queen Mary University of London (the UK, 2018) investigating the legal implications of cloud robotics; and at the University of Twente (NL, 2017) as a postdoc, exploring iterative regulatory modes for robot governance. He holds an Erasmus Mundus Joint Doctorate (EMJD) in Law, Science, and Technology coordinated by the University of Bologna (IT, 2017), an LL.M. from University of Toulouse (FR, 2012), an M.A. from the Autonomous University of Madrid (ES), and an LL.B. from the Autonomous University of Barcelona (CAT, 2011). He is also a qualified lawyer in Spain, fluent in Catalan, Spanish, English, Italian and French.
