
TABLE OF CONTENTS

Prologue		VII
List of Abbreviations		XIII
List of Figures		XVI
One	Introduction	1
1.1	Research Objective	1
1.2	Methodology	5
	1.2.1 The grounded theory approach	6
	1.2.2 The explanatory components	6
	1.2.3 The empirical components	7
1.3	Research Methods	7
	1.3.1 The modern State	8
	1.3.2 Case study framework	9
	1.3.3 Case study overview	10
1.4	Outline	13
Two	The Modern State	15
2.1	The Constitutional Nature of the Modern State	15
2.2	Pre-Constitutional Landmarks	20
	2.2.1 The Magna Charta (1215)	20
	2.2.2 The English Bill of Rights (1689)	22
	2.2.3 Conclusion	23
2.3	The Constitution of the Liberal Democracy	24
	2.3.1 The US experience	24
	2.3.2 The French experience	27
	2.3.3 Two experiences compared	29
2.4	The Constitutional Structure of the Liberal Democracy	30
	2.4.1 Democratic representation	31
	2.4.2 Checks and balances	32
	2.4.3 Individual rights	36
2.5	Constitutional Commitments and Responsibilities	38
	2.5.1 The liberal democracy	39
	2.5.2 The development of the welfare State	42
2.6	Conclusion	46

Three	Globalization, Interdependence and the Internet	49
3.1	The Interdependent State	49
3.2	The Internet Architecture	55
	3.2.1 Packet switching transmission technique	56
	3.2.2 End-to-end design principle	58
	3.2.3 Layered design model	59
3.3	Transnational Interdependence	61
	3.3.1 The Internet as a catalyst for globalization	61
	3.3.2 The Internet as instrument for examination	63
3.4	Conclusion	66
Four	Interdependence and Domain Name System Management	69
4.1	Introduction	69
4.2	The Domain Name System	71
	4.2.1 The technical characteristics of the DNS	71
	4.2.2 Globalization and the DNS	74
	4.2.3 State responsibilities and the DNS	76
4.3	ICANN's Alleged Accountability Problem	78
	4.3.1 Solutions to a problem	81
	4.3.2 Two misconceptions	83
	4.3.3 Market accountability and the DNS	86
	4.3.4 State participation in ICANN	86
4.4	The State and the DNS Revisited	89
	4.4.1 Security	90
	4.4.2 Welfare	92
	4.4.3 Intellectual property rights	92
4.5	Conclusion	94
Five	Interdependence and Technical Standardization	97
5.1	Introduction	97
5.2	Standards	99
	5.2.1 The Code is law thesis	101
	5.2.2 Internet standards	103
	5.2.3 Standard setting on the Internet	104
5.3	US Communication Policy	106
	5.3.1 Digitalization and encryption	107
	5.3.2 CALEA and Voice over IP (VoIP)	112
5.4	State Interests and Internet Standards	115
	5.4.1 Routing	116
	5.4.2 International Domain Names	117
	5.4.3 Security, authentication and identification	118
5.5	State Participation in Internet Standard Setting	119
	5.5.1 Institutional setting	120

	5.5.2	Procedures and principles	123
	5.5.3	Standard setting in action: IPv6 and privacy	125
5.6		Conclusion	125
Six		Interdependence and Search Operator Censorship	129
6.1		Introduction	129
6.2		The Significance and Workings of Search Operators	130
	6.2.1	Basic tasks	131
	6.2.2	Gateway function	132
6.3		China's Information Policies	133
6.4		The Global Online Freedom Act	134
	6.4.1	General outline and effects	135
	6.4.2	GOFA's inconsistency	138
6.5		China's Road to Reform	142
	6.5.1	China's economic reform program	142
	6.5.2	China's political reform program	143
	6.5.3	Censorship and Chinese reform	144
6.6		The Use of Legal Frameworks	146
	6.6.1	The fragmentation of legal frameworks	146
	6.6.2	Limitations to a human rights framework	148
	6.6.3	Search operator censorship revisited	150
	6.6.4	Trade-centered solutions	151
6.7		An Antitrust Solution	153
	6.7.1	General features of the antitrust framework	154
	6.7.2	Implications for battling censorship	156
6.8		Amendments to a Framework	157
	6.8.1	Advantages	159
	6.8.2	Practical implications	160
	6.8.3	Feasibility	161
6.9		Conclusion	162
Seven		Interdependence and Network Neutrality	167
7.1		Introduction	167
7.2		Net Neutrality, Phrasing the Question	168
7.3		The Argument from Design	170
	7.3.1	An incomplete solution	172
	7.3.2	The biased nature of the Internet	174
	7.3.3	Conclusion	177
7.4		The Current Internet Reality	178
	7.4.1	The technical and commercial reality	178
	7.4.2	Current legal practice	180
	7.4.3	Conclusion	189
7.5		Reframing the Debate	190

7.6	Global Communication Policy	194
	7.6.1 The UN and the IGF	195
	7.6.2 The WTO and the OECD	198
	7.6.3 Conclusion	199
7.7	National Communications Policy	199
	7.7.1 Maintaining a competitive advantage	200
	7.7.2 A democratic deficit	201
	7.7.3 Conclusion	202
7.8	Accountability and Interdependence	202
	7.8.1 Regulatory competition	203
	7.8.2 Considerations on competition and innovation	204
7.9	Conclusion	207
Eight	Conclusions	213
8.1	Introduction	213
8.2	US Policies and the Internet	214
	8.2.1 Institutional challenges	214
	8.2.2 Regulatory challenges	216
	8.2.3 The State and the Internet	219
8.3	Constitutional Governance and Interdependence	221
	8.3.1 Distinguishing elements in the inquiry	222
	8.3.2 Generalization of the results	222
	8.3.3 Implications for decision making in the public interest	225
8.4	Implications for Further Research	227
	Epilogue	231
	Bibliography	233
	Laws and Regulations	251
	List of Cases	255
	Index	257
